

## **AAP ANNUAL MEETING OBJECTIVE**

AAP's Annual Meeting is designed for psychiatrists who are interested in learning about academic development, teaching psychiatry, and research on psychiatry education. The meeting is filled with interactive workshops designed to teach a wide array of academic topics. "How To" sessions teach academic and leadership development, use of technology in teaching, resident and faculty teacher development, and a host of other topics in resident and medical student education. The annual meeting is a wonderful way to interact with academic psychiatrists and psychiatry leaders in a casual and inviting setting filled with accessible workshops, informal sharing, and academic mentoring. It is an ideal venue for residents and fellows to develop an interest in education, junior faculty to launch an education-based career, and senior faculty to expand their skills and meet colleagues from across the country.

**Theme: Navigating the Peaks and Valleys: Education in Uncertain Times**

**Michael Peterson, MD, PhD**

**2025-2026 AAP President**
